

**In The Specification:**

Please amend the paragraph beginning on page 6, line 12 as follows:

Fig. 7 shows the results of a sensitivity test using plasmid DNA templates, each of which carry the HPV 11, 16, 18 or 31 L1 gene. FIG. 7A shows measured band intensity of separated PCR products on agarose gel. FIG. 7B shows band intensity measured using the software Quantity One (Bio-Rad), and the relationship between band intensity and the number of plasmid copies;
